DAMANI CHIEF OF STAFF · FOR SCHOOLS AND DISTRICTS

See every classroom's writing on one rubric.

The district version of Damani Educator Assist, in development at Damani Digital Learning: a fuller review of student writing, more consistent grades, and reteaching groups drawn from students' actual results.

IN DEVELOPMENT · PREVIEW AVAILABLE

Four reports for leaders

01 A fuller review of student work

Every submission is reviewed on the same rubric, not a sample each teacher selected.

02 More consistent grades

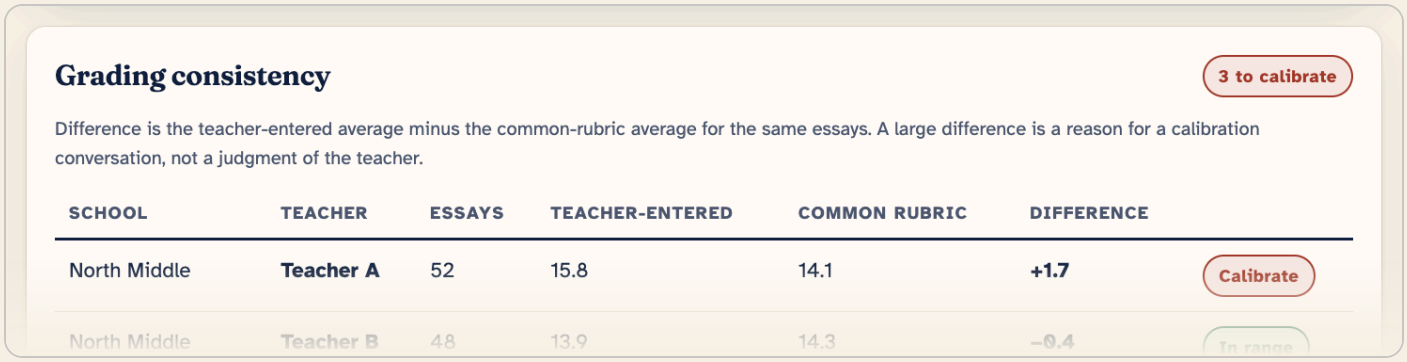

See where teacher-entered grades differ from the common rubric: a reason to calibrate, not a judgment of the teacher.

03 Small groups from actual results

Students are sorted into reteach, practice and extend groups from their own scores. Administrators see the groups as each class set is graded.

04 Standards to reteach

The standards where the most students fell short, each with a recommended lesson.

Grading consistency — 3 to calibrate

Difference is the teacher-entered average minus the common-rubric average for the same essays. A large difference is a reason for a calibration conversation, not a judgment of the teacher.

SCHOOL	TEACHER	ESSAYS	TEACHER-ENTERED	COMMON RUBRIC	DIFFERENCE	
North Middle	**Teacher A**	52	15.8	14.1	**+1.7**	Calibrate
North Middle	Teacher B	48	13.9	14.3	−0.4	In range

The grading consistency report in the preview. The schools, teachers and figures are made up to show the report.

A founding pilot starts small

Free for founding partner districts.

1. Choose one school or grade team, and one writing task your teachers already assign.
2. Teachers grade as usual. Chief of Staff reviews every submission on the common rubric alongside them.
3. Leaders read the four reports and decide whether it has earned a wider rollout.

$5,000+

per school, each school year (planned)

Includes Educator Assist Premium for every teacher. At the starting price, a school with 22 or more teachers pays less than Premium for each teacher ($19 a month).

Where it stands today

- A clickable preview is open. Its AI steps are simulated and its data is made up.
- Every score is a draft until a teacher approves it.
- The privacy and security review (FERPA, COPPA and your district's data agreement) has not been done yet. It comes before any pilot with real student work.
- Word and CSV downloads work now. Learning management system connections are planned.
